

EnlightenVue Update: Progress & Key Milestones

We're pleased to launch our first newsletter and bring you along on the enlightenVue journey.

Our mission is to transform minimally invasive procedures through innovation, collaboration, and clinical insight. Our technology is built around a 2mm microendoscope with an expandable tip—designed to enable new levels of precision and access in patient care. As we advance through key technical, clinical, and strategic milestones—strengthening our foundation and preparing for commercialization—we look forward to sharing regular updates on our progress.

This newsletter will keep you informed, highlight perspectives from our team and advisors, and showcase the milestones shaping our path forward.

Thank you for joining us at the start of this journey—we look forward to keeping you informed, inspired, and engaged.

Product Development & Engineering Partnerships

We have partnered with two contract engineering firms to develop our Generation 2 microendoscope, designed specifically for targeted procedures. As prototype development continues, we're actively pursuing additional funding to support commercialization and begin revenue generation. We're exploring both institutional funding sources and strategic partnerships to secure the necessary capital for launching our next generation SurgiVue microendoscopes.

Scientific Advisory Board Expansion

We've expanded our Scientific Advisory Board with four leading clinicians who will guide clinical workflow design, user interface development, and help establish early clinical sites. They join our existing members Dr. D. Lee Gorden, Dr. Craig Derkay, and Dr. Roberto Viganò.

New Advisory Board Members:

- **Desmond H. Birkett, MD** – General Surgery, Lahey Hospital and Medical Center; Clinical Professor of Surgery, Tufts University School of Medicine
- **David J. Feller-Kopman, MD** – Chief, Pulmonary and Critical Care Medicine, Dartmouth-Hitchcock Medical Center; Professor of Medicine, Geisel School of Medicine
- **Naomi Garland, MD** – Independent Consultant, General Surgery
- **John D. McKee III, MD** – Board Certified Gastroenterologist and Internist, Singing River Health System

Market Research & Clinical Strategy

Guided by Dr. Garland and our Key Opinion Leaders across hepatobiliary surgery, gastroenterology, pulmonology, and urology, we've identified our clinical focus for the expandable, articulating microendoscope:

Primary Focus:

- Biliary Surgery, including gallstone removal and bile/pancreatic duct exploration.
 - Hepatobiliary Surgery – Stone removal, biopsy, duct exploration
 - Upper Therapeutic GI (ERCP) – Diagnosis and treatment of bile duct conditions
- Pulmonary
- Urology
- Endovascular

Each application will have procedure-specific design specifications to optimize performance.

Intellectual Property

We recently received two additional U.S. patents, further strengthening our global IP portfolio:

- U.S. Patent: “Endoscope with variable profile tip” — covering our expandable tip design
- U.S. Patent: “Direct endoluminal- and/or endovascular-illumination systems” — covering our endovascular endoscopy technology

These patents reinforce our innovation protection and create new opportunities for strategic partnerships.

Marketing & Communications

Our website has been updated with new materials available for download:

- Executive Summary (PDF)
- Health Economic Study (PDF)
- Pediatric Pilot Trial Overview (PDF)
- A Pitch Deck is available upon request.

Financial Operations & Series B Capital Raise

We are preparing to launch our Series B capital raise to fund:

- Final development of the procedure-specific articulating microendoscope
- FDA submission and regulatory readiness
- Initial commercialization activities

Thank You

We sincerely appreciate your continued support as we move closer to clinical and commercial readiness. Please feel free to reach out with any questions or feedback.

Warm regards,

The EnlightenVue Team

Robert Kucharski,
Co-founder,
President, Board Chair

Alan D. Lucas,
Director

Gabriele Brambilla,
Director

Doug Jones,
Commercialization
